“Innovations by
competence”

“Product innovations arise in the dialogue with our customers – by developing, testing, optimizing.”

Pilot Plant

- innovative product development department
- state-of-the-art machinery
- can be transferred scale 1:1 into production from the pilot plant

Development and testing laboratory

- modern equipment ensures accurate and reproducible measurements
- continuous improvement processes guarantee highest quality

DIN EN ISO 9001 : 2008

DIN EN 9100 : 2003

DIN EN ISO 13485 : 2003 + AC : 2009

“Products are getting better, processes become safer – while we invest in people, technology and surrounding conditions.”

Twisting technologies

- high quality and efficient yarn production
- all common thread operation technologies used
- adaption of the twisting process to the needs of our customers

Winding technology

- variety of different yarn make-ups possible
- customized winding type, spool weight and final preparation for a high quality product

Impregnation and coating technology

- additional functionalities through finishing, coating and impregnation of yarns

Medical and other sensitive applications

- very high standards of hygiene and cleanliness
- certified according to DIN EN ISO 13485

“Logistics and strategic distribution partnerships – our base for more flexibility and growth.”

Our benchmark:

customer focus, reliability and service.

Natural fibers, chemical fibers, high-tech fibers

- maintaining of networks by cooperating with suppliers and customers
- merger of three companies combines long term experience and know-how
- specialists in development, production and distribution of custom yarns for high-tech industries such as automotive, medical and filtration

DSM Dyneema recognizes **gruschwitz gmbh Tech-Twists** for being a reliable and technical proficient distribution partner, committed to sustainable service and support to its customers.

“From idea to finished product”
